OESN PROVIDES YOUR BUSINESS WITH A HANDS ON RESPIRATOR FIT- TESTING AND TRAINING PROGRAM USING QUANTITATIVE FIT TESTER 3000 CE

DIRECTLY MEASURES LEAKAGE FLOW – THE PRIMARY
MEASURE OF RESPIRATOR FIT

Conforms to CSA Standard Z94.4-11
Selection, Use & Care of Respirators

COMPLIANCE HEALTH AND SAFETY

DID YOU KNOW.....

- ✓ Fit testing should be conducted every two years
- ✓ Retesting is required if and when a worker's physical traits have changed, affecting the seal of the respirator
- ✓ If a respirator is not properly fit tested, contaminated air will bypass the filter system and enter the individuals lungs
